Hi Katrina –

We'd like to mobilize an office trailer and port-o-john for the geophysics effort. We'd leave it there through the end of October to accommodate the CPT/LIF investigation as well. We would put it in the fenced area in the church parking lot. Can we tap into the church's breaker box? We can compensate them for any power used.

Tom

Hi Tom,

Looks like the trailer will require a 100 amp on a 220 double pole breaker connection. I'm not sure if the church's circuit breaker panel can accommodate that. I have a generator scheduled to come out if we need it. If you can find out any information from the church I would appreciate it.

Have a good weekend ☺

Chris
